MINE PLANNING ENGINEER

This is an exciting time for Bemax and for any professional in the mineral sands industry. Bemax is a leading producer of mineral sands products and its parent company, Cristal, is one of the largest producers and suppliers of titanium dioxide in the world.

An opportunity exists for an experienced Mine Development Engineer to join our team based at Bunbury (approximately 2 hours drive south of Perth).

We are currently seeking a Mining Engineer with planning skills to be part of a small team responsible for the development of comprehensive mine plans and schedules for current operating and future mine sites in Western Australia.

The position is based in Bunbury, however there will be a requirement for visits to future and current operating sites.

Duties will include but not be limited to:

- Preparation of life of mine plans and schedules
- Compilation of physical and financial budgets
- Develop waste/overburden system plans, including backfill optimisation
- Integration of planning and scheduling with operations
- Provide input and coordinate external consultants/contractors associated with new development projects
- Provide technical inputs to operational sites
- Liaise with internal and external bodies when required to achieve outcomes

The successful applicant will have a degree or diploma in Mining Engineering and at least 8 years post graduate experience, preferably in the mineral sands industry. Individuals experienced in the use of Surpac, MineSched or Whittle would be highly regarded.

The position requires a highly motivated person with excellent communication skills and a willingness to work as part of a team. An attractive salary package is available.

Interested applicants should apply in writing, giving full details to hr@bemax.com.au. For further information please call Therese Jackson, Senior Human Resources Advisor on 08 9721 0213.
